Plastic panel

X-Guard plastic panels offer a durable and lightweight safety fence solution for industrial safety. With impact resistance, chemical protection, and easy-to-clean surfaces, they ensure machine safety while maintaining visibility. Easily integrated with X-Guard systems, they provide a reliable and cost-effective guarding option.

Improve workplace safety with X-Guard plastic panels, a versatile safety fence solution designed for industrial safety applications. Made from durable, impact-resistant plastic, these panels effectively guard against small flying objects, accidental collisions, and chemical exposure, promoting a secure working environment. Their lightweight design allows for easy installation and repositioning, while their transparent material provides clear visibility of automated processes.

Ideal for industries requiring strict hygiene standards, X-Guard plastic panels are easy to clean and resistant to bacterial buildup, making them a smart choice for food processing and pharmaceutical facilities. Designed to integrate seamlessly with X-Guard posts and door systems, these panels offer a cost-effective alternative to traditional metal guarding solutions.

Built to withstand temperatures up to 60°C, X-Guard plastic panels combine strength, flexibility, and efficiency—ensuring optimal machine safety without compromising productivity. For more protection, install the included cover strip to eliminate gaps between the panel and post.
