Detachable hinge door

The X-Guard detachable hinge door is a mobile hinge door on wheels and meant to be operated the same way as a normal hinge door. This door is a great option when space around the door is limited. If desired, just detach it and roll it aside. The rigid handlebar makes the door stable and easy to handle. Each support wheel has a parking brake.

The X-Guard detachable hinge door is a versatile and mobile safety solution designed for industrial environments where space is limited. Functioning like a traditional hinge door, it features wheels for easy movement, allowing it to be quickly detached and rolled aside when needed. This flexibility makes it ideal for dynamic workspaces that require frequent adjustments to access points.

Built with a sturdy handlebar for enhanced stability, the door is easy to operate while maintaining its structural integrity. Each support wheel is equipped with a parking brake, ensuring secure positioning when in use.

Compliant with the Machinery Directive 2006/42/EC, this mobile hinge door provides a reliable and adaptable solution for machine guarding, warehouse entry points, and other industrial safety applications. Its space-saving design and mobility make it a smart alternative to fixed doors in confined areas.

Note: The maximum width may vary depending on the locking solution. Posts, handles, and panels are not included in the door package.
