Single sliding door without rail

Single sliding doors without rails are the ideal solution where objects higher than the rail need to pass through the opening. The door is a good choice where goods must be moved using an overhead traveling crane or fork lift truck.

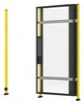

Maximum height is 2500 mm and maximum width is 2900 mm. **The maximum width varies depending on the used locking solution.*

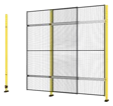

(Posts, handles and panels are not included in the door package. Opening dimensions may be limited depending on the type of lock chosen.)
