

Essential Pedestrian with Two Rails

The X-Protect Essential Pedestrian Barrier with Two Rails safely separates pedestrians from vehicles in light-duty areas. It maintains an open layout, creating clear routes and efficient flow while reducing the risk of collisions.

The Essential Pedestrian Barrier with Two Rails offers reliable separation between pedestrians and moving equipment while maintaining an open and accessible layout. Ideal for areas with lower impact risks, the system helps define safe pedestrian routes and supports efficient traffic flow across the facility.

Improve workplace safety by adding the Floor Barrier to your configuration. Designed to create a clear physical boundary between pedestrian walkways and vehicle routes, it offers effective low-level protection in areas with forklift trucks, AMRs and AGVs. By limiting ground-level contact points, it helps reduce damage from forks and pallets while improving overall traffic organisation.

Installation is straightforward, with a low fixing count that speeds up assembly and minimises disruption to floor surfaces.

Key features

- Fast to install
- Kind to the floor
- Easy to repair

Impact test results					
Area of impact	Load	Equivalent to		90° Deflection	Force to fixings
Centre of barrier C-C as below					
2000mm	1700 J	2500 kg 4.2 km/h	1500 kg 5.4 km/h	385mm	5.1kN
