Cutting package

Panels may need to be cut to precise heights and widths in some environments. The X-Guard cutting pack can be used to help you cut panels and is available in both vertical and horizontal versions.

The vertical comes in four heights; 750, 1300, 1900 and 2200 mm. The horizontal only comes in 1500 mm but is compatible with all widths and is available with or without attachments to allow unrestricted positioning. The standard cutting pack colour is black (RAL 9011) but customised colours are available upon request.

A rubber strip can be fitted to provide a soft and neat edge where mesh panels have been cut.

ACCESSORIES

Edge strip

The X-Guard edge strip provides a clean edge on cut mesh panels. The rubber strip covers sharp edges, improving both safety and appearance.
