

Edge strip

The X-Guard edge strip provides a clean and smooth finish for cut or exposed panel edges. A soft rubber strip (**10-9841**) for cut mesh panels enhancing both safety and appearance.

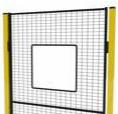

The X-Guard edge strip is designed to improve safety and aesthetics in machine guarding systems by covering exposed edges on mesh panels. It provides a smooth finish, reducing sharp edges and enhancing the durability of panel installations.

The **10-9841 rubber edge strip** offers a soft and neat edge solution for areas where mesh panels have been cut, ensuring a professional and secure finish.

The solution enhance industrial safety by minimizing sharp edges and improving the overall appearance of the X-Guard system. Easy to install, they are essential accessories for maintaining a polished and safe working environment.
