Klikbeslag

A number of brackets are available for X-Guard. These allow simple and quick attachment of panels to posts.

The quick fittings has a top and a bottom attachment. The top fitting is a simple click-on fitting which can be fitted to the three sides of the post. The click-on function means simple and above all quick fitting. A fitter is only required to fit mesh panels to X-Guard machine guards.

The lower fitting acts as a guide to steer the panel into the correct position. The panel is simply clicked into place in the top bracket, when it is in place.

A quick fitting is also available for free positioning of the X-Guard post (K1-01).
