

Bike-Up Twin Classic

Double-sided bike rack that optimizes and maximizes the number of bike seats you can fit in your bike room.

The advantage of this rack is that the front wheels of the bicycles are reversed. You therefore save 0.5 meters in depth on each row of bike racks that are placed - compared to placing traditional bicycle racks back to back.

Tips from Axelent's experts!

The stand is advantageously placed in the middle of a room.
