Caja con pulsador para puerta corredera

Caja de pulsadores en metal con recubrimiento de polvo negro. Listo para instalar hasta 4 pulsadores (Ø22,5 mm) y 1 pulsador de parada de emergencia. Para cubrir los orificios donde no se instalan botones pulsadores, se incluyen 4 tapones de cubierta negros (B00-038). Pulsadores y botón de parada de emergencia no incluidos.

The X-Guard push button enclosure is a robust and adaptable solution for integrating push button controls into sliding door locking systems. Made from black powder-coated metal (RAL 9011), it accommodates up to 4 push buttons (Ø22.5 mm) and 1 emergency stop button, offering a streamlined way to manage access in machine guarding applications.

For added flexibility, cabling can be routed from above, below, or behind the enclosure, allowing easy installation across different setups. If fewer than four push buttons are used, four black cover plugs (B00-038) are included to maintain a clean and professional appearance.

Measuring 340 x 53 x 56.5 mm, the enclosure is compatible with all X-Guard proprietary lock systems, ensuring seamless integration into industrial safety solutions. It is specially designed for sliding door applications, providing a secure and efficient access control solution.

Note: Push buttons and emergency stop button are not included.
