Chaîne de câble flexible pour portes coulissantes

Solution intelligente et design pour les portes coulissantes lorsque l'alimentation est nécessaire sur la porte elle-même. Par exemple, pour un interrupteur de verrouillage de porte.

Spécialement conçu pour les portes coulissantes, avec ou sans rail supérieur, où il manque un poteau fixe pour fixer un câblage. Un certain nombre de kits ont été créés en fonction de la hauteur du système, du type de porte et de la taille requise de l'ouverture. Voir la liste de toutes les combinaisons et la référence d'article.

Disponible pour toutes les hauteurs (sauf 1400 mm). La limite du diamètre du câble est fixée à 8 mm.

Notez qu'en cas d'absence de panneau continu à côté de la porte, le kit entraîne une réduction de l'ouverture maximale de la porte, d'au moins 182 mm.

The X-Guard sliding door cable kit is an elegant and practical solution for supplying power to movable doors, particularly when an interlock switch or other electrical components are needed. Specifically designed for **double sliding doors with center lock**, it works seamlessly with or without an overhead rail—ideal in situations where a fixed post for cabling is unavailable.

A range of kits is available, tailored to system height, door type, and required opening size. This ensures compatibility with various **X-Guard machine guarding** configurations, providing a flexible and reliable industrial safety solution. The kit supports all heights except 1400 mm, with a maximum cable diameter of 8 mm.

Important: If no continuous panel is present next to the door, the kit reduces the maximum door opening by at least 182 mm.

For a full list of compatible configurations and article numbers, refer to the product documentation.
