

Axellent Bikestand

Bikestand that saves you both space and money

We know all about safety and smart solutions

We who are behind Axelent have a wealth of experience in product safety and are well-versed in how the industry works. We have found that safety can be divided into two areas: Overall safety, which requires analysis, customised solutions and more extensive surrounding work, and continuous safety, which is more focused on individual products. This is where Safe-X comes in with its unique product concepts. A quick call or an order in our online store and your delivery will arrive in a couple of days.

The most revolutionary on the market that saves you both space and money

With so much focus on environmental awareness these days, the bike has become a popular mode of transport, so we at Axelent decided to do our bit for the environment by selling bike racks.

2-storey bike rack

Our new 2-story bike rack doubles the capacity compared with traditional solutions. Optimum space saving and ease of use.

The rack is available in four different types, from the simpler model where the bike is lifted onto the second storey by hand, to the version with an extendable bar and a gas spring to help you lift it up.

SAFE-X BIKE RACK, DOUBLE RACK WITH EXTENDABLE BAR
