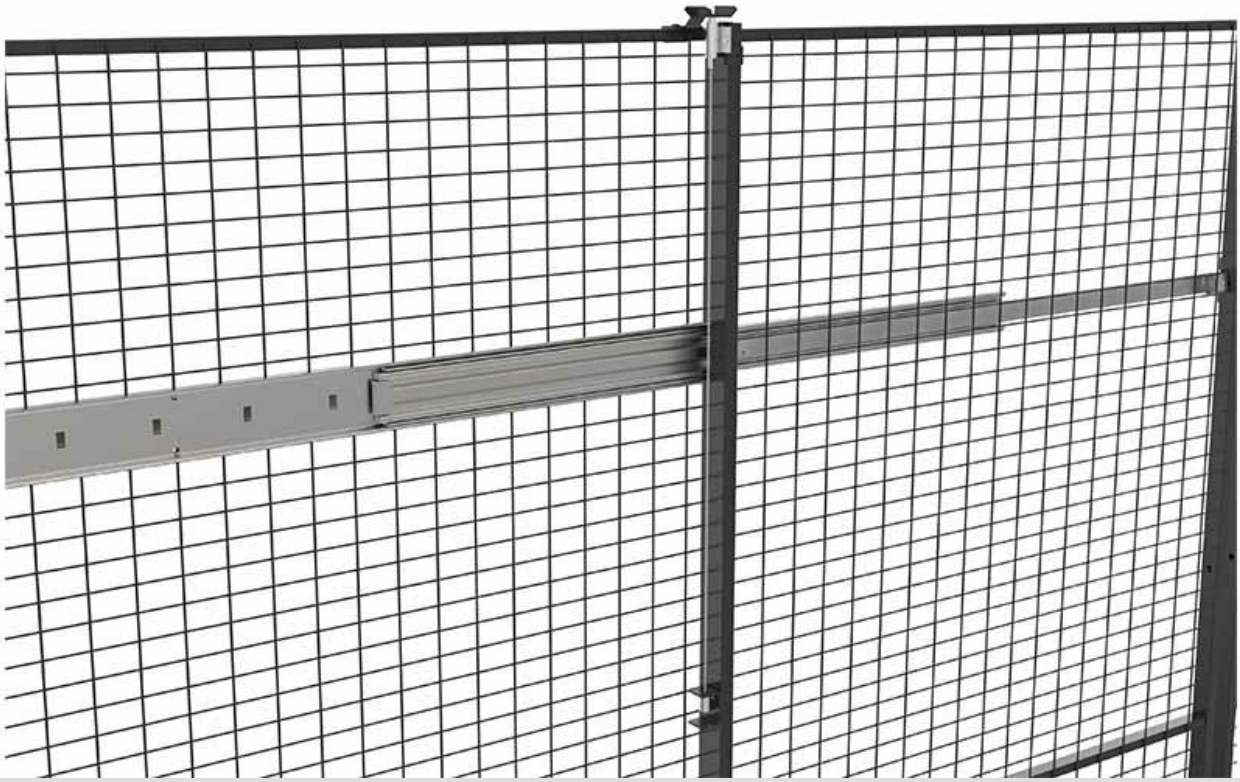
Locking pin for door modules

The Locking Pin for Door Modules prevents unintended door movements, ensuring stability and safety in industrial settings. Easy to install and adjust, it fits multiple door models (D27, D28, D29, D57, DP27, DP28, DP29, DP57) for a secure and efficient workflow.



Our Locking Pin for Door Modules is engineered to seamlessly integrate with a wide array of door types, providing a versatile solution to prevent unintended door movements. This feature is paramount in maintaining a stable and controlled environment, crucial for optimizing operational workflows and minimizing disruptions.

Easy to install and requiring minimal maintenance, our locking pin is a cost-effective investment that significantly contributes to the safety and efficiency of your workplace. Its intuitive design allows for quick adjustments and locking, enabling a flexible yet secure setting tailored to your specific needs.
