Push button enclosure for sliding door

Push button enclosure in black powder-coated metal. Ready for installing up to 4 push buttons (Ø22.5 mm) and 1 emergency stop button. In order to cover the holes where no push buttons are installed, 4 black cover plugs (B00-038) are included. Push buttons and emergency stop button not included.

Cabling can be routed from above, below or behind the enclosure.

The push button enclosure is suitable for all types of sliding door solutions and is compatible with all our proprietary lock systems.
