

X-It

Axellent X-It is a keyed cylinder lock designed primarily for all our modular mesh panel systems for machine guarding, industrial/warehouse. Thanks to the unique construction and it's simple assembly, the lock can also be used for similar third party products/systems available on the market.

The lock is a unique design that requires no additional lock housing, just add a standard cylinder such as Euro. The lock is robust with a cover in metal to withstand tough conditions, and is tested and approved according to SS-EN 12209:2016. X-It fits for both hinge or sliding doors.

The lock can also be combined with a mechanical panic / emergency unit. The product is patent pending.

X-It Electric

Can be used in various places within warehouse and production environments, preferable in relation to already installed access systems. In case of power failure the lock has an escape release function on the inside.

- Light to indicate open or locked
- Cylinder lock with mechanical key that overrides the electronic function
- Compatible with most electric access lock systems such as RFID, card readers, Pin code units etc. The electric access lock system is not included.

X-It advantages

- Robust construction
- Unique locking function
- Convenient
- Flexible, fits for both hinge or sliding door
- Ordered in right or left execution
- Simple assembly

- Tested and approved according to SS-EN 12209:2016
- Extended functions possible
- Certified product
- Supplied in a specially designed box
- The lock is patent pending
- Possibility to block closure with padlock for service and maintenance (Lockout/Tagout)
