Goal Post

The X-Protect Goal Post is designed to create clear height warnings for vehicles in warehouse and industrial environments. Installed in loading areas, restricted passages and internal traffic routes, the product helps prevent accidental impacts with overhead structures and surrounding infrastructure. Its flexible construction makes the product easy to install and adapt to different layouts and clearance needs.

The X-Protect Goal Post is a highly visible height warning product designed for warehouse and industrial environments. It helps reduce the risk of accidental contact with overhead structures in loading areas, restricted passages and internal traffic routes.

The highly visible design helps improve driver awareness and reduce the risk of accidental contact around entrances, loading areas and internal traffic routes. Its flexible construction makes the product easy to install and adapt to different layouts and clearance needs.

The adaptable rail height enables the solution to suit different clearance requirements, while tested impact performance ensures reliable protection in demanding industrial environments. Installation is fast and straightforward using the same simple installation approach as the rest of the X-Protect range.

Key features

- Clear visual height warning
- Modular X-Protect integration
- Fast and easy installation

- Flexible rail height
- Tested impact performance

Impact test results

	Area of impact	Load		Equivalent to	90' deflection	Force to fixings
Goal Post 3400	End post	4200 J	2500 kg 6,6 km/h	5000 kg 4,6 km/h	N/A	8,2 kN

* Deflection of posts is equivalent or less than that of the rail/s and is not considered to be critical for product selection. Performance is tested at height of the lowest rail. The post will perform better for lower strikes and deflection.
