Flexible cable chain for sliding doors

The X-Guard sliding door cable kit provides a smart solution for delivering power to movable doors, ideal for interlock switches. Designed for double sliding doors with or without an overhead rail, it enhances industrial safety in machine guarding systems.

The X-Guard sliding door cable kit is an elegant and practical solution for supplying power to movable doors, particularly when an interlock switch or other electrical components are needed. Specifically designed for **double sliding doors with center lock**, it works seamlessly with or without an overhead rail—ideal in situations where a fixed post for cabling is unavailable.

A range of kits is available, tailored to system height, door type, and required opening size. This ensures compatibility with various **X-Guard machine guarding** configurations, providing a flexible and reliable industrial safety solution. The kit supports all heights except 1400 mm, with a maximum cable diameter of 8 mm.

Important: If no continuous panel is present next to the door, the kit reduces the maximum door opening by at least 182 mm.

For a full list of compatible configurations and article numbers, refer to the product documentation.
