Detachable hinge door

The X-Guard detachable hinge door is a mobile safety solution for areas with limited space. Mounted on wheels, it functions like a standard hinge door but can be easily detached and rolled aside. With a stable handlebar and parking brakes, it meets the Machinery Directive 2006/42/EC.

The X-Guard detachable hinge door is a versatile and mobile safety solution designed for industrial environments where space is limited. Functioning like a traditional hinge door, it features wheels for easy movement, allowing it to be quickly detached and rolled aside when needed. This flexibility makes it ideal for dynamic workspaces that require frequent adjustments to access points.

Built with a sturdy handlebar for enhanced stability, the door is easy to operate while maintaining its structural integrity. Each support wheel is equipped with a parking brake, ensuring secure positioning when in use.

Compliant with the Machinery Directive 2006/42/EC, this mobile hinge door provides a reliable and adaptable solution for machine guarding, warehouse entry points, and other industrial safety applications. Its space-saving design and mobility make it a smart alternative to fixed doors in confined areas.

Note: The maximum width may vary depending on the locking solution. Posts, handles, and panels are not included in the door package.

Models
