Double telescopic sliding door

The X-Guard double telescopic sliding door is a smart safety solution for areas with limited space in front. With overlapping panels, it creates a large opening without needing extra room to slide. Max width: 2x1500 mm, height: 2500 mm. Complies with Machinery Directive 2006/42/EC.

The X-Guard double telescopic sliding door is designed for industrial environments where a large opening is needed, but space is restricted to the side and front, e.g in connection to a vehicular routes. Instead of sliding fully outward, its overlapping panels move along a 2-step rail system, reducing the required clearance. With a maximum width of 2x1500 mm and a height of 2500 mm, it provides efficient access while maintaining a compact footprint.

This space-saving safety solution ensures compliance with the Machinery Directive 2006/42/EC. Its simple design allows for easy installation, and the door can be customized with various locking mechanisms to suit different security requirements.

Ideal for warehouses, production areas, and workspaces where traditional sliding doors are impractical, the X-Guard double telescopic sliding door enhances accessibility without compromising safety.

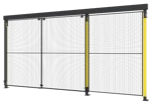

Note: The maximum width may vary depending on the locking solution. Posts, handles, and panels are not included in the door package.
