Single hinge door

The single hinge door is a practical and cost-effective choice for machine safety, serving as an access point or emergency exit. With a simple design, easy installation, and customizable lock options, it fits most environments, and meets the Machinery Directive 2006/42/EC.

The X-Guard single hinge door is a smart and reliable choice for industrial safety, commonly used as an entryway or emergency exit. Designed with simplicity in mind, it consists of only a few components, making installation quick and hassle-free. The door is suitable for most environments and can be easily adapted with different locks and interlocks to match specific safety requirements, as well as integrate with cable ladder systems.

With a maximum opening width of 1455mm, the X-Guard single hinge door seamlessly integrates into safety fence systems. The exact width may vary depending on the chosen locking mechanism, and posts, handles, and panels are not included in the door package. To maintain full functionality, opening dimensions should be considered based on the lock type.

The door is compatible with Axelent's range of cable ladders, offering additional flexibility in machine safety solutions. For businesses needing a tailor-made option, custom solutions are available upon request. Its durable design, ease of installation, and competitive price make it a cost-effective and practical solution for various industrial applications.
