

Axelent X-It is a keyed cylinder lock designed primarily for all our modular mesh panel systems for machine guarding and industrial/warehouse. Thanks to the unique construction and it's simple assembly, the lock can also be used for similar third party products/systems available on the market.

The lock is a unique design that requires no additional lock housing, just add a standard cylinder such as Euro. The lock is robust with a cover in metal to withstand tough conditions, and is tested and approved according to SS-EN 12209:2016. X-It fits for both hinge or sliding doors.

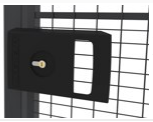

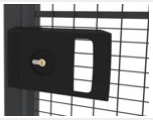

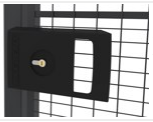

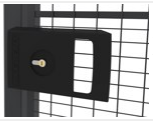

The lock can also be combined with a mechanical panic / emergency unit. The product is patent pending.
