Triple telescopic sliding door

The X-Guard triple telescopic sliding door is a space-saving safety solution for industrial environments. With overlapping panels on a 3-step rail, it provides a large opening while requiring minimal side clearance. Max width: 3x1500 mm, height: 2500 mm. Complies with Machinery Directive 2006/42/EC.

The X-Guard triple telescopic sliding door is designed for industrial settings that require a large opening but have limited space for traditional sliding doors. Featuring a 3-step rail system, the panels overlap instead of sliding fully outward, reducing the need for side clearance while maintaining easy access. With a maximum width of 3x1500 mm and a height of 2500 mm, it offers a practical and efficient safety solution.

This door is ideal for warehouses, manufacturing facilities, and other areas where wide openings are needed for workflow efficiency. Its sturdy design ensures durability, while the smooth sliding mechanism allows for effortless operation. The door can also be customized with different locking options to meet specific safety requirements.

Compliant with the Machinery Directive 2006/42/EC, the X-Guard triple telescopic sliding door provides a secure and space-efficient alternative to conventional safety doors.

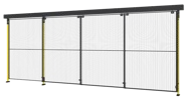

Note: The maximum width may vary depending on the locking solution. Posts, handles, and panels are not included in the door package.
